## MagnumDisk Go-Devil Drop Bar

### Description:

The Magnumdisk™ Go-Devil is dropped at surface to break the ceramic disk in the Single and Dual Magnumdisk™ to communicate the annulus below the tubing, casing or packer with the production tubing. The Magnumdisk™ Go-Devil is made of millable brass so as not to inhibit any remedial milling operation in the future. The Magnumdisk™ Go-Devil has a fishing neck if it becomes necessary to fish the Go-Devil due to debris accumulation on the ceramic disk.

### Features:

- *Standard fishing neck*
- *Brass construction*
- *1" OD on standard Magnumdisk™; applications*
- *Allows for safe rupturing of Magnumdisk™ with high differential*
- *May be run in any environment and depth*
- *Go-Devil may be lubricated in the top of the tree and dropped by opening the tree valve*
- *Length of bar can vary upon depth of Magnumdisk™*
- *Full opening of Magnumdisk™ on Single or Dual Magnumdisk™*
- *Pointed impact point for more efficient rupturing*
- *Economical alternative to coil tubing or slick line rupturing*
- *Ruptures ceramic disk into small crushable fragments*

LENGTH OF GO-DEVIL WILL VARY ACCORDING TO DEPTH AND DEVIATION. GREATER THAN 55° DEVIATION DO NOT USE GO-DEVIL DROP BAR.

### Specifications: (Inches & Fahrenheit)

PART #	DESCRIPTION	WEIGHT OF BAR	FLUID	DRY	FISHING NECK	EXTERNAL DIAMETER
09.DBGD.100.0110	GO-DEVIL 18"	4 lbs	N/A	0'-7,000'	1.0"	1.0"
